

ENWELUMCHIAMAKA

Data Analyst

📍 Remote (UTC +1) | Global Teams ✉ enwelumchiamaka@gmail.com  [Linkedin](#)  [Kaka's Hub](#)  [Portfolio](#)  [Medium](#)

SUMMARY

Data analyst specialising in product and operational analytics, with experience using SQL, Python, and Power BI to transform large, messy datasets into actionable business insights. Skilled in churn analysis, funnel optimisation, and performance tracking with proven impact, including a 10% reduction in operational costs and measurably faster reporting cycles. Known for finding the inefficiencies others miss and turning them into clear recommendations that teams can actually act on

WORK EXPERIENCE

Jobaaj Learning | Data Analyst

May 2025 - Present

- Analyse operational and project data, including task timelines, cost records, and resource allocation, to support performance tracking and management reporting.
- Used SQL and Power BI to examine turnaround times, task completion rates, and cost patterns, surfacing actionable insights for stakeholders.
- Design and maintain dashboards to monitor operational performance and flag workflow bottlenecks in real time.
- Clean and validate datasets by resolving missing values, duplicates, and formatting inconsistencies, improving overall reporting accuracy.
- Identified inefficiencies in task allocation and workflows, contributing to a 10% reduction in project costs.

Eratechnologize | Junior Data Analyst

Jan 2024 - March 2025

- Cleaned and structured 2,000+ weekly operational records using SQL and Excel, resolving duplicates and inconsistent formatting to ensure data integrity.
- Built Power BI dashboards using star schema modelling and DAX measures to track the full task lifecycle from assignment through to completion.
- Analysed operational data to pinpoint delays in task completion and cost inefficiencies across workflows, delivering targeted recommendations.
- Performed data validation checks (null values, duplicates, and referential integrity) to improve KPI reporting reliability.
- Weekly reporting using Excel Power Query, reducing manual reporting effort by 3 hours per week.

Octave Incorporation | Data Analyst Intern

Feb 2023 - April 2023

- Cleaned and validated datasets using Excel and Power BI, resolving missing values, duplicates, and formatting inconsistencies to ensure data quality ahead of analysis.
- Applied data modelling techniques in Power BI to structure datasets for reliable, consistent reporting.
- Explored datasets to identify trends, patterns, and outliers using Excel and Power BI, helping uncover insights from the data.
- Built interactive Power BI dashboards and visual reports to communicate findings clearly to non-technical stakeholders.

SKILLS

Tools & Technologies: Python (Pandas, NumPy), SQL, Excel (Pivot Tables, Power Query), Power BI, Tableau

Analytics Expertise: Churn Analysis, Funnel Analysis, Customer Segmentation, A/B Testing, KPI Definition, Conversion Optimization

Digital Analytics & Data Systems: Google Analytics, PowerPoint, Canva, OBS Studio

Data & Business Execution: Data Cleaning, Data Validation, Data Reconciliation, Dashboard Development, KPI Reporting, Storytelling, Stakeholder Communication

PROJECTS

Trial Activation & Conversion Analysis | Python & SQL

- Analysed behavioural data from 100K+ trial organisations using Python and SQL, discovering that early-stage activation drove conversion more than return frequency (~16% activation rate, ~23% conversion lift).
- Built a trial activation framework using event-level features to guide onboarding improvements, translating findings into actionable recommendations for the product team.

Customer Churn Analysis | Excel, Python & Power BI

- Analysed 10,000+ customer records (tenure, usage, subscription type) to identify key churn drivers and at-risk segments.
- Used Python (Pandas, NumPy) for feature-level analysis and churn pattern detection.
- Built dashboards and reports to support data-driven retention strategies, with recommended actions projected to reduce churn by 15%.

Retail Sales & Customer Behavior Analysis | Excel, Power BI, Python

- Cleaned and validated 1,000+ sales transactions using Python, ensuring accurate revenue and profit reporting.
- Built interactive Power BI dashboards to track sales trends, KPIs, and product demand, enabling decision-making.
- Segmented customers by age, gender, and product preferences, delivering actionable recommendations for retention and product optimisation.

EDUCATION

Ebonyi State University

Nov 2023

Bachelor of Engineering (B.Eng) in Computer Science

Coursework: Data Management, Statistics, Software development, Machine learning, Algorithms

EXTRACURRICULARS & CERTIFICATIONS

- IBM: Certified Data Scientist | Generative AI for All
- Data & Business Analytics Specialization Nanodegree Program
- British Airways (Forage, Oct 2023): Data Analyst Simulation; Predicting customers' buying behaviours
- Tata (Forage, March 2026): Data Visualisation Simulation; Framing the Business Scenario, Creating Effective Visuals, Communicating Insights and Analysis
- BCG (Forage, March 2026): Data Science; Customer Churn Analysis (Python, Pandas, NumPy), Random Forest model (85% accuracy), Actionable insights.
